

# “Never Miss a Compliance Deadline Again”

Webco's E-Man compliance management system is a simple to use internet application that enables companies to effectively manage environmental, health and safety compliance requirements. We incorporated over 25 years of compliance experience into E-Man with the goal of building an efficient, practical system to improve compliance performance without adding unnecessary work for those using the system or managing the compliance process.

## What Is E-Man?

E-Man provides automatic email notifications to remind personnel of upcoming compliance deadlines. The system also generates exception-based email notifications to management personnel on deadlines about to “slip through the cracks”, to enable management to react and prevent a missed deadline.

E-Man also provides a detailed compliance calendar to assist in organizing a facility's or individual's compliance deadlines. Additional resources, such as procedures, work instructions, spreadsheets, etc. may be electronically linked to a compliance deadline.

## How Can E-Man Help?

- **Timely Compliance:** Email reminders and exception emails prevent missed deadlines;
- **Organization:** Centralized deadline information, including compliance calendars, which may be linked to work instructions, procedures, etc.;
- **Succession Planning:** Facilitates transition of compliance responsibilities and reduces the time to bring new personnel up to speed;
- **Quick to Implement:** Common EH&S “template” deadlines assist and streamline facility setup. No elaborate data entry required;
- **Easy to Use and Administer:** Simple, intuitive interface. Minimal time required for users to access/use the system (minutes per week);
- **Reasonable Cost:** Minimal initialization fee, with annual fee based on number of facilities.

## Testimonials

- *“E-Man allows us to minimize the use of internal resources needed to effectively manage our compliance process. This enables us to focus those resources on manufacturing activities”* Vice President of Operations
- *“Staying on top of all the federal, state and local environmental compliance deadlines for 25 facilities has always been difficult. E-Man solves that problem – I now know in advance the due dates for each issue, and with their email notification system providing timely reminders, nothing gets overlooked”* Corporate Director, SH&E
- *“E-Man is an integral part of our EH&S compliance process, assuring upper management that compliance tasks were completed on time”* Director, EH&S

## For More Information

We have found the easiest way for potential clients to learn about E-Man is allowing use of our system on a trial basis – no strings attached.

Experience how E-Man can improve your compliance process. For additional information, or to set up a trial account, contact Walter Bowles directly at (513) 605-8990, or email at [wbowles@webcoenv.com](mailto:wbowles@webcoenv.com).
